Personal Profile

Detail-oriented HTML email and front-end developer dedicated to creating high-performance, visually consistent email templates and webpages that deliver seamless experiences across platforms. Proficient in HTML, CSS, and front-end JavaScript, with expertise in responsive design and development best practices. An enthusiastic learner who brings creative problem-solving and technical expertise to dynamic development teams.

Projects List

Kadedra Ceramics – Invoice Template

A responsive HTML email invoice template for a mock ceramics company, optimized for consistent rendering across major email clients and devices. With a clean aesthetic and user-friendly experience, that adheres to best practices in HTML email design.
